Flutter Mobile App Developer and Web Developer

About me

I am a passionate and dedicated Flutter Developer with three years of experience in creating mobile applications that deliver exceptional user experiences. I have a strong foundation in both front-end and back-end development, allowing me to build robust and feature-rich apps. My commitment to staying up-to-date with the latest Flutter trends and best practices ensures that I can develop high-quality and scalable applications.

Technical Skills

Front End Design: HTML, CSS, Bootstrap

Framework: JavaScript, Flutter, Springboot, Laravel, Vue

Database: MySQL, SQL, Firebase, Restful API

Version Control: GitHub, BitBucket

Programming Language: C, Java, PHP, Dart, Python

Others: NodeJs, TypeScript

- Proficient in Flutter framework and Dart programming language.
- Strong understanding of mobile app architecture patterns such as GetX, BLoC and Provider.
- Experience integrating Restful API and Firebase to fetch and display dynamic data.
- Solid knowledge of version control systems like Github, BitBucket for collaborative development.
- Ability to optimize app performance and ensure a smooth user experience.
- Adept at working in an Agile environment, collaborating with cross-functional teams.

Experience

Over the past three years, I have dedicated my career to Flutter development, honing my skills and contributing to various projects. My journey began with a strong foundation in mobile app development and a passion for creating seamless user experiences. I can say, I am proficient in

the Flutter framework and Dart programming language, a strong understanding of mobile app architecture such as Flutter Bloc, GetX, and Provider. I also have experience integrating Restful API and solid knowledge of version control systems.
